

# Student Identification System

SunGard K-12 Education is working with identiMetrics to bring finger scanning student identification to K-12 school districts nationwide. identiMetrics is the leader in providing biometric finger scanning solutions for K-12 schools.

One of the many challenges facing schools today is accurately identifying students. The bottom line is that schools receive federal and state funds based on accurate and auditable records. In addition, schools need to provide a safe and secure environment for all their students and staff.

Over the past few decades, schools have been implementing new technologies to both improve student achievement and streamline operations. Smart boards, laptops and real-time Internet resources are just a part of a student's everyday experience.

As we move into the 21st century, schools are faced with a myriad of problems never encountered in previous decades. Security has become a significant concern. It is now crucial that school administrators know who is in their schools and where the students are at all times. Accurate and auditable attendance and reporting is vital in not only securing, but also maintaining, essential governmental funding.

Accurate identification and tracking of students is now critical in all aspects of the day-to-day management and administration of our schools. By using biometric finger scanning for identification, the problems and costs associated with out-dated identification methods can be avoided and new standards of accountability can be put into place.

## identiMetrics Benefits:

- Saves time and money...and streamlines your district's operations
- Compiles accurate and auditable records for essential federal and state funding
- Improves security for students and staff
- Works with eSchoolPLUS and any other third party software application you already have, with one biometric database
- Eliminates ID cards and ID numbers
- Use the system anywhere in your school where you need student identification!

## WHAT OUR CUSTOMERS ARE SAYING

"Our goal was simple: Find a way to guarantee the security of the students' accounts. We chose identiMetrics because they are leaders in implementing biometrics in schools and understand the unique needs of the K-12 districts they serve."

Mary Moyer, PRSBS  
 Director of Food Service  
 Manheim Central School District, Manheim, PA

## Functionality

### THE IDENTIMETRICS FINGER SCANNING ID SYSTEM™:

The identiMetrics Finger Scanning ID System is a powerful biometric ID platform that uses your students' fingers to provide indisputable proof of their identity. It eliminates the need for ID cards and ID numbers, allowing school districts to increase accountability, improve operations, and boost security.

The identiMetrics Finger Scanning ID System is the only finger scanning ID system designed by educators specifically for the needs of schools and integrates easily with their existing third party software applications.

**How Does it Work?** Once the students are enrolled in the identiMetrics Finger Scanning ID System, they can be identified quickly and accurately to any third party software application in your school that uses swipe card, bar code or ID number input.

The identiMetrics Finger Scanning ID System uses a single common database for student identification in the cafeteria, classroom, attendance office, school entrance, nurse's office, library, for dances and athletic events – anywhere in your school where you need to identify students.

The system does not store actual fingerprint images, only templates that are numeric representations of an individual fingerprint's minutiae. The actual fingerprint cannot be reconstructed from the template.

Finger scanning identification offers a cost-effective, reliable, easy and efficient way for school administrators to know for certain who is in their schools, where the students are each period of the day, and that they receive the services they require and deserve.

By utilizing the unique fingerprint of the student for identification, tracking and security, the problems and costs associated with the current expensive or inaccurate methods of identification are avoided. Finger scanning is the missing component that provides the irrefutable accuracy that has long been needed in our schools.

### The identiMetrics Finger Scanning ID System Requirements

#### Software Requirements

- Computer Workstation
- Windows® 2000™
- Windows® 2000 Professional™ with SP4
- Windows® XP Home Edition™
- Windows® XP Professional™
- Windows® 2003 Server™
- Vista
- Win 7 (32 bit)

#### Hardware Requirements

- Processor: 1.5 Ghz minimum – Recommend 2.0 or higher CPU
- Memory: 512 MB minimum - Recommend 1 GB
- Available USB port or Ethernet connection
- External Speakers
